

IntraLearn™ e-360

The bridge between skills-based management and e-Learning

Corporations can:

Manage knowledge assets better

Accelerate learning across the extended enterprise

Bridge the skills gap

Help suppliers train their employees

Train & certify sales and resellers

Assess learning performance

Generate robust reports

Update courses immediately

Create courses in Office 2000

Import commercial courses

Afford to implement e-Learning

Provide training in a variety of languages

Accessible e-Learning

The revolutionary IntraLearn e-360 enables companies to match learning outcomes to corporate objectives. Corporations can now manage the full 360-degree learning cycle essential to staying competitive in today's knowledge-based marketplace. From a single e-Learning platform, companies can match business objectives to skills required, assess employee skills and gaps, set learning objectives, create or obtain courseware, deliver and measure interactive learning, and gather and present the results.

Feature-rich Application

IntraLearn e-360 integrates the features of expensive learning solutions into a single product with built-in course catalogs, remote registration, course creation, interactive delivery, assessments, and collaborative tools like chat, threaded discussions, e-mail, whiteboards, Internet links, and group/mentor rooms. Reports on learner progress and skill attainment are automatically generated.

Skills-based Management

IntraLearn e-360 integrates SkillBridge, which allows corporations to catalog skills and proficiencies, align them with strategic objectives and quickly deliver targeted e-Learning to close those gaps. SkillBridge serves as a powerful decision-support tool helping companies identify skill gaps, promote career and skills development, evaluate workforce proficiencies, and perform skill-set and resume searches.

Extended c-Learning

IntraLearn e-360 is the first e-Learning product that enables connected e-Learning, or 'c-Learning', by combining powerful skills assessment software, unlimited Icosa Learning Centers, and community-building

collaborative tools with a fully integrated e-Learning platform. IntraLearn e-360 helps align business objectives with training requirements across their entire corporate community. C-learning links all members of an enterprise's extended family - suppliers, vendors, employees, sales, resellers, corporate customers and consumers - thereby creating a competitive edge with faster time-to-market, better supply chain communication, and a well-trained workforce.

IntraLearn e-360 Platform

Integrating with Microsoft Windows 2000/Solaris/Linux and a SQL Server/Oracle8i relational database is the only way to build and maintain an enterprise-class software architecture capable of securely managing a fully integrated and highly scalable e-Learning application. IntraLearn's unique Icosa Learning Center technology enables corporations to create individualized e-Learning platforms for every supplier to train their employees.

Courseware

Integrated Office 2000 authoring enables courses to be quickly and easily created directly inside IntraLearn e-360. Learning service providers and their clients can easily:

- Create courses with wizards and templates
- Import courses created in popular authoring tools
- Cut & paste HTML
- Import standards-based commercial courseware
- Share or copy courses between Icosa Learning Centers

IntraLearn e-360 is AICC- certified, SCORM and IMS/LRN2- compliant. Every Icosa Learning Center can be offered with its own local language and customized interface.

Microsoft®
GOLD CERTIFIED

Partner

'Technology to power the e-Learning revolution'

System Administration

Registration	Remote and batch registration, connects to external database
Course & System Admin.	Hierarchical administration at system, course and learner levels; course catalog
Single Database	All courses and interactivity contained and run from a SQL Server database

Course Management

Courseware	Create in IntraLearn e-360 with Office 2000, upload or import third party content
Collaboration	Whiteboards, teams, document sharing, email, and synchronous tools
Rich Interactivity	Group chat, Internet links, threaded discussion
Learning Support	Glossary, FAQs, announcements, search, notes, assignments, bookmarks, help

Measurement

Exams & Gradebooks	Threshold testing, reporting and analysis. Secure access to progress records
Assessment	IntraLearn e-360 measures and records competency and prints customized certificates
Skills-based Management	Embedded SkillBridge for skills-gap analysis
Reporting	Comprehensive, built-in and easily customizable reports

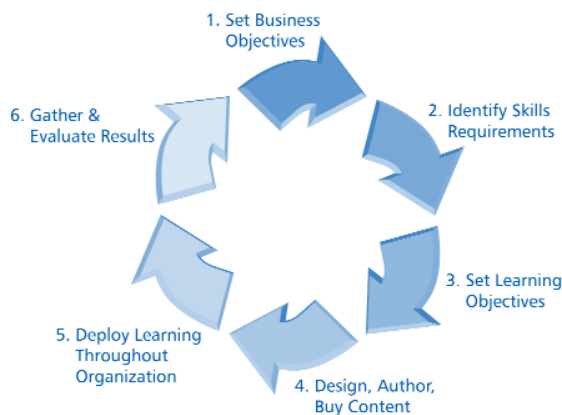

Connected Learning

Multiple Learning Systems	Unlimited number of Learning Centers from a single shared server
Secure Global Management	Centralized administration of entire system
International Languages	Each Learning Center has its own switch-selectable language

IntraLearn e-360 Features:

- Import and manage industry-standard courses
- System, course and learner tracking
- Instructor and learner profiles
- Sophisticated analysis and reporting
- Robust security identification/validation
- Unattended learner administration, registration and payment
- Course catalog
- Create courses directly in IntraLearn e-360
- Integrated Office 2000 authoring
- Remote proctoring
- No Java to affect firewalls
- Access via standard Internet browsers
- Features are switch-configurable
- Online tutorials and help
- Announcement board
- Automatic certificate issuance
- Built-in collaboration
- Lesson export utility
- External collaboration tools
- Local multimedia file reader
- Streaming multimedia
- Live Internet links
- Localize language
- Gradebooks
- Self-correcting tests with instructor comments and links to related topics

The Learning Cycle

Server Requirements

IntraLearn e-360 gets its incredible power and scalability by running on the following:

- Windows 2000/NT/Linux/Solaris
- Microsoft SQL Server 7.0/2000/ Oracle8i
- Microsoft IIS 5.0/4.0/Apache
- Macromedia Cold Fusion 5.0 Enterprise/ Professional
 - Crystal Reports Developer 8.5
 - 512 MB RAM minimum
 - CPU Processor 700 MHz minimum
