

intralearn™ XE

e-Learning platform for the extended enterprise

IntraLearn XE provides:

Fully integrated e-Learning platform

Multiple Icosa Learning Centers

Centralized control of entire system

Comprehensive system-wide reporting

Security and scalability

Shared courses across ports

Online registration

A repository for sharing learning objects

Automatic language conversion

Built-in course creation & testing

e-Commerce capability

IntraLearn Icosa Learning Centers

IntraLearn XE gives corporations the ability to offer individual e-Learning platforms to their extended enterprise of suppliers, dealers, distributors, consumers, and various internal departments. IntraLearn XE builds upon the powerful IntraLearn SME product by giving customers the ability to add unlimited Icosa ports to their main system. Each Icosa port is a complete IntraLearn platform residing on a platform with its own look, feel, language and shared courses.

IntraLearn XE was specifically developed to extend enterprise e-Learning with a system of unlimited, unique Icosa Learning Centers integrated into a single, centralized relational database.

New Economics with XE

With its unique architecture and licensing model, IntraLearn XE is changing the way learning is offered online. Enterprises can host multiple unique Icosa Learning Centers, each running the equivalent of a fully integrated e-Learning system and capable of offering thousands of courses. IntraLearn XE pricing and distribution models, coupled with its e-Commerce and online registration capabilities, make offering courses and customized learning centers simple and secure, unique yet centrally-managed.

IntraLearn Platform

Integrating with a powerful relational database management system is the ideal way to build and maintain an architecture capable of coordinating and managing multiple Icosa Learning Centers. IntraLearn XE has been designed to leverage the scalability of Microsoft SQL Server 2000, Oracle, Unix & Linux and the security features of Microsoft

Windows 2000.

IntraLearn XE is Microsoft Windows 2000 Server-certified and the company is a Microsoft Tier1 e-Learning and Gold Certified partner.

Course Creation

Integrated Office 2000 authoring allows courses to be quickly and easily created directly inside IntraLearn XE. In one product, learning providers can easily:

- Create courses with wizards and templates
- Import courses created in popular authoring tools
- Cut & paste HTML
- Use MS Office and Inline Editor
- Create categories for courses and students
- Import standards-based commercial courseware
- Share or duplicate courses between Icosa Learning Centers

IntraLearn XE is AICC-certified, SCORM and IMS/LRN2-compliant. Every Icosa Learning Center offers international language support, a customizable interface and independently configurable features.

Distributed Learning, Centralized Controls

IntraLearn XE provides affordable access to an extended multi-port system. The distributed computing model of IntraLearn XE provides users with powerful training tools directly and easily.

Although each Icosa Learning Center is an independent e-Learning System, it shares a central repository for courses and learning objects. With IntraLearn XE, each Icosa Learning Center has a unique look and feel while integrated with a single, centralized database for secure management, tracking, and reporting.

'Technology to power the e-Learning revolution'

System Administration

e-Commerce-enabled	Secure e-commerce capabilities, online registration
Course & System Admin.	Hierarchical administrative control at system, course and learner levels
Single Database	All courses and interactivity contained and run from a SQL Server database
